## Tier 3 Intervention Planning Guide

**Learning Target:** I will add 3-digit numbers

**Readiness** for multiplying multi-digit numbers

### Recommended Actions

**Beginning**

**5 min.**
- Review the learning target with the whole group
- Ask each student to set a goal for the day based on their previous Quick Check Score
- Have each student use a highlighter to plot their goal for the day

**Middle**

**15 min.**
- Model solving a word problem – “I do” *(Sessions 1, 3 and 6 only)*
- Guided Practice – “We do”

**Sessions 1 and 2:** Add 3-digit numbers using base-ten blocks and place-value cards
**Sessions 3, 4 and 5:** Add 3-digit numbers using base-ten drawings and showing sub-totals
**Sessions 6, 7 and 8:** Add 3-digit numbers using place-value understanding and showing new tens

**End**

**10 min.**
- Bring the students back together.
- Ask students to reflect on their progress towards the learning target
  - What did I learn today about adding 3-digit numbers?
  - How confident do you feel about adding 3-digit numbers on my own?
    (Thumbs up, down, or sideways)
- Assess each student’s progress using the next Quick Check form
- Guide students to self-correct their Quick Check
- Guide students to chart their progress in their Growth Chart
  - If not using Delta Math lessons, record the activity in the table
- Collect each student’s Quick Check and Growth Chart

**After Session 6**

- Differentiation Options:
  - Allow students who met the learning goal to work independently while others do the guided practice during the next session
  - Exit students who met the learning goal for a third time
- Problem solve with a team to plan additional support for students who do not meet the learning goal within 8 sessions
Session 1: Modeling (I Do)

**Learning Target:** I will add 3-digit numbers

**Readiness for:** multiplying multi-digit numbers

A food truck sold 185 lunches on Saturday and 152 lunches on Sunday. How many total lunches did the food truck sell on Saturday and Sunday?
Learning Target: I will add 3-digit numbers

Ready for multiplying multi-digit numbers

A food truck sold 185 lunches on Saturday and 152 lunches on Sunday. How many total lunches did the food truck sell on Saturday and Sunday?

I am going to think aloud to model solving this problem.

Your job is to watch, listen, think and ask questions.

First, it is important to know what the problem is about.
The problem is about a food truck selling lunches.

Second, I need to determine what I need to find.
I need to find the total number of lunches sold on Saturday and Sunday.

Third, I need to determine what I know.
I know that the food truck sold 185 lunches on Saturday and 152 lunches on Sunday.

Fourth, I need to figure out what I can try.
I am going to try using base-ten blocks and place-value cards to help me find the total number of lunches.

I will begin by building the problem...
Saturday’s total was 1 hundred, 8 tens and 5 ones.
(Build the number 185 with place-value blocks and cards.)

And, Sunday’s total was 1 hundred, 6 tens and 2 ones.
(Build the number 162 with base-ten blocks and place-value cards.)

To find the total number of lunches on both days, I need to use addition.
(Set the plus sign “+” to the left of the 162.)

Next, I will find each sub-total...
2 hundreds equals 200...14 tens equals 140...and 7 ones.
(Point to the blocks, re-arrange them and set the cards under each type.)

Last, I need to combine place-value to find the total...
2 hundreds and 10 tens make 3 hundreds.
(There are 300 blocks underneath the sub-totals)

This leaves me with 4 tens and 7 ones. (Set the 40 card on top of the 300 and 7 on top of the 40.)

Last, I need to make sure that my answer makes sense.

I found that the food truck sold 347 total lunches on Saturday and Sunday. It makes sense because I built each number with base-ten blocks and combined the place-values to see a total of 3 hundreds, 4 tens and 7 ones.
A food truck sold 185 lunches on Saturday and 152 lunches on Sunday. How many total lunches did the food truck sell on Saturday and Sunday?
Place-Value Cards (1 → 100)

Session 2: Self-Reflection

**Learning Target:** I will add 3-digit numbers

Briefly discuss student responses

➤ What did I learn today about adding 3-digit numbers?

➤ How confident do I feel about adding 3-digit numbers on my own?

*(Thumbs up, down, or sideways)*
Quick Check - Form B

Name__________________________________  Date________

Learning Target: I will add three-digit numbers.

Directions: Write the answer to each problem. (Work time: 4 minutes)

1. \[
\begin{array}{c}
3 \ 7 \ 5 \\
+ 5 \ 1 \ 8 \\
\end{array}
\]

2. \[
\begin{array}{c}
1 \ 6 \ 2 \\
+ 4 \ 2 \ 7 \\
\end{array}
\]

3. \[
\begin{array}{c}
5 \ 7 \ 2 \\
+ 3 \ 8 \ 9 \\
\end{array}
\]

4. \[
\begin{array}{c}
5 \ 7 \ 6 \\
+ 8 \ 4 \ 9 \\
\end{array}
\]
Session 3: Modeling (I Do)

**Learning Target:** I will add 3-digit numbers

**Readiness for multiplying multi-digit numbers**

Jack had 265 baseball cards before his 10th birthday. Jack’s uncle gave him 197 baseball cards on his 10th birthday. How many baseball cards did Jack have after his 10th birthday?
Session 3: Modeling  *(I Do - Teacher Notes)*

**Learning Target:** I will add 3-digit numbers

**Readiness** for multiplying multi-digit numbers

Jack had 265 baseball cards before his 10th birthday. Jack’s uncle gave him 197 baseball cards on his 10th birthday. How many baseball cards did Jack have after his 10th birthday?

I am going to think aloud to model solving this problem.

Your job is to watch, listen, think and ask questions.

**First, it is important to know what the problem is about.**
The problem is about Jack’s baseball cards.

**Second, I need to determine what I need to find.**
I need to find how many baseball cards Jack had after his 10th birthday.

**Third, I need to determine what I know.**
I know Jack had 265 baseball cards and his uncle gave him 197 baseball cards.

**Fourth, I need to figure out what I can try.**
I am going to try using base-ten drawings to help me combine the hundreds, tens and ones and record them on separate lines.

I will begin by writing and drawing what I know... 265 cards can be drawn as 2 hundreds, 6 tens and 5 ones. *(Write, label and draw the 265 baseball cards.)*

And, 197 cards can be drawn as 1 hundred, 9 tens and 7 ones. *(Write, label and draw the 197 baseball cards.)*

Since I need to find the total, I will write a plus sign and a line underneath the 197. *(Write the + sign and line.)*

To add the ones...5 + 7...I will circle ten of them to help me...7 ones and 3 ones make 10. *(Circle ten ones.)*

And 2 more ones make 12 ones. *(Point to the 2 ones and 10 circled ones. Then write “12 Ones” under the drawing.)*

I will record the 12 ones under the answer line. *(Write 12 as a sub-total.)*
Continued:

To add the tens...6 + 9...I will circle 10 of them to help me...9 tens and 1 ten make 10 tens.
(Circle 10 tens.)

And 5 more tens make 15 tens.
(Point to the 10 circled tens and extra 5 tens and write “15 tens” under the drawing.)

I will record the 15 tens as 150 on another line.
(Write 150 as a sub-total.)

<table>
<thead>
<tr>
<th></th>
<th>Baseball Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before</td>
<td>2 6 5</td>
</tr>
<tr>
<td>Gift</td>
<td>+ 1 9 7</td>
</tr>
<tr>
<td></td>
<td>1 2</td>
</tr>
<tr>
<td></td>
<td>1 5 0</td>
</tr>
</tbody>
</table>

To add the hundreds...2 + 1...I see a total of 3.
(Point to the 2 hundreds and 1 hundred. Then write “3 hundreds” under the drawing.)

I will record the 3 hundreds as 300 on another line.
(Write 300 as a sub-total.)

<table>
<thead>
<tr>
<th></th>
<th>Baseball Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before</td>
<td>2 6 5</td>
</tr>
<tr>
<td>Gift</td>
<td>+ 1 9 7</td>
</tr>
<tr>
<td></td>
<td>1 2</td>
</tr>
<tr>
<td></td>
<td>1 5 0</td>
</tr>
<tr>
<td></td>
<td>3 0 0</td>
</tr>
</tbody>
</table>

Last, I will draw a final answer line and add the sub-totals from each line.
(Draw the final answer line and the label “Total Cards.”)

1 hundred plus 3 hundreds equal 4 hundreds.
(Point to the hundred’s digits of each sub-total and write “4” in the hundred’s place of the answer.)

1 ten plus 5 tens plus 0 tens equals 6 tens.
(Point to the ten’s digits of each sub-total and write “6” in the ten’s place of the answer.)

And 2 ones plus 0 ones plus 0 ones equals 2 ones.
(Point to the one’s digits of each sub-total and write “2” in the one’s place of the answer.)

<table>
<thead>
<tr>
<th></th>
<th>Baseball Cards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before</td>
<td>2 6 5</td>
</tr>
<tr>
<td>Gift</td>
<td>+ 1 9 7</td>
</tr>
<tr>
<td></td>
<td>1 2</td>
</tr>
<tr>
<td></td>
<td>1 5 0</td>
</tr>
<tr>
<td></td>
<td>3 0 0</td>
</tr>
<tr>
<td>Total Cards</td>
<td>4 6 2</td>
</tr>
</tbody>
</table>

Last, I need to make sure that my answer makes sense.

I found that Jack had a total of 462 baseball cards. It makes sense because I made a math drawing of each number of cards and combined them to see a total of 4 hundreds, 6 tens and 2 ones.
Learning Target: I will add 3-digit numbers

Session 3: Guided Practice (We Do)

We Do Together: (Teacher Actions)
- Say the addition problem.
- Use a base-ten drawing to and find each sub-total to add the 3-digit numbers.

1.  
   
   \[
   \begin{array}{c}
   \text{139} \\
   \text{+ 654} \\
   \end{array}
   \]

2.  
   
   \[
   \begin{array}{c}
   \text{953} \\
   \text{+ 328} \\
   \end{array}
   \]

3.  
   
   \[
   \begin{array}{c}
   \text{749} \\
   \text{+ 675} \\
   \end{array}
   \]
Learning Target: I will add 3-digit numbers

**Session 3: Guided Practice (We Do - Continued)**

**You Do Together:** (As a class, or in small groups)

- Students take turns leading to add 3-digit numbers using place-value drawings.

4. 

```
  3 5 4
+ 4 2 7
```

5. 

```
  7 3 6
+ 5 4 7
```

6. 

```
  9 7 4
+ 4 5 8
```
Learning Target: I will add 3-digit numbers

Session 3: Guided Practice *(We Do – Teacher Notes)*

**We Do Together:** (Teacher Actions)

- Say the addition problem.
- Use a base-ten drawing to and find each sub-total to add the 3-digit numbers.

1. 

   \[

<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I am going to try using base-ten drawings to help me combine the hundreds, tens and ones and record them on the same line.</td>
<td></td>
</tr>
</tbody>
</table>
| I will begin by writing and drawing what I know...the 248 fourth graders can be drawn as 2 hundreds, 4 tens and 8 ones.  
(Write, label and draw the 248 4th graders.) |  |
| And, the 175 fifth graders can be drawn as 1 hundred, 7 tens and 5 ones.  
(Write, label and draw the 175 5th graders.) |  |
| Since I need to find the total, I will write a plus sign and a line underneath the 175.  
(Write the + sign, line and “Total Students”.) |  |

<table>
<thead>
<tr>
<th>To add the ones...8 + 5...I will circle ten to help me.</th>
<th></th>
</tr>
</thead>
</table>
| 8 and 2 makes 10 and 3 more is 13.  
(Circle ten ones and write 10 next to it.) |  |
| I will record the new ten in the ten’s place on the answer line and the 3 ones in the answer.  
(Write “1” in the ten’s place on the answer line and “3” in the one’s digit of the answer.) |  |
To find add the tens...4 + 7 + 1...I will circle 10 to help me.

7 and 3 make 10 and 1 more is 11. *(Circle 10 tens and write 100 next to it.)*

Plus the new ten is 12 tens, or 120

I will record the new hundred on the answer line and the 2 tens in the answer. *(Write “1” in the hundred’s place on the answer line and “2” in the ten’s digit of the answer.)*

To add the hundreds...2 + 1 + 1..., I can do this in my head...4. *(Point to the original 2 hundreds and the new hundred in the drawing.)*

I will record 4 hundreds in the hundred’s place in the answer. *(Write “4” in the hundred’s place of the answer.)*

Last, I need to make sure that my answer makes sense.

I found that there were 423 students on the playground. It makes sense because I made a math drawing of each grade level of students, created new tens and hundreds to help me the total of 4 hundreds, 2 tens and 3 ones.
Learning Target: I will add 3-digit numbers

Session 6: Guided Practice (We Do)

We Do Together: (Teacher Actions)

- Add the 3-digit numbers using your place-value understanding and finding new groups of 10.
- Draw a picture to check your work or help you find the answer.

1. 
   \[
   \begin{array}{c}
   \phantom{+}438 \\
   + \phantom{0}654
   \end{array}
   \]

2. 
   \[
   \begin{array}{c}
   \phantom{+}953 \\
   + \phantom{0}527
   \end{array}
   \]

3. 
   \[
   \begin{array}{c}
   \phantom{+}749 \\
   + \phantom{0}684
   \end{array}
   \]
Learning Target: I will add 3-digit numbers

Session 6: Guided Practice (We Do - Continued)

You Do Together: (As a class, or in small groups)

- Students take turns leading to add the 3-digit numbers.

749 \\
+684 \\
\hline
1433 \\
\end{array}
\]
Session 6: Self-Reflection

Learning Target: I will add 3-digit numbers

Briefly discuss student responses

➢ What did I learn today about adding 3-digit numbers?

➢ How confident do I feel about adding 3-digit numbers on my own?

(Thumbs up, down, or sideways)
**Quick Check - Form F**

Name__________________________________  Date________

**Learning Target:** I will add three-digit numbers.

**Directions:** Write the answer to each problem. (Work time: 4 minutes)

1. \[
\begin{array}{c}
375 \\
+518 \\
\end{array}
\]

2. \[
\begin{array}{c}
162 \\
+427 \\

- How confident do I feel about adding 3-digit numbers on my own?  
  *(Thumbs up, down, or sideways)*
Quick Check - Form H

Name__________________________________  Date________

Learning Target: I will add three-digit numbers.

Directions: Write the answer to each problem. (Work time: 4 minutes)

1.  
   \[ \begin{array}{c}
   428 \\
   +167 \\
   \end{array} \]

2.  
   \[437 + 186 = \_\_\_\_] \]

3.  
   \[515 + 463 = \_\_\_\_] \]

4.  
   \[ \begin{array}{c}
   678 \\
   +689 \\
   \end{array} \]
Learning Target: I will add 3-digit numbers

Title of Game: Build the Greater Sum

Number of Players: 2

Objective: To build the greatest sum.

Materials: 1 set of 3-digit number cards per group and 1 recording sheet per player.

Directions:

➢ Shuffle the 3-digit number cards and place them face down in a pile on the table.

➢ Players take turns: Choose three 3-digit number cards, place 2 of them on the game mat below to create an addition problem and discard the card not used.

➢ After both 3-digit numbers addition problems have been created, each player writes their problem on the recording sheet and finds their sum.

➢ Each player shares their problem and the sum.

   "My addition problem is _____ + _____."

   "My sum is _____."

➢ The player with the greatest sum circles the problem on their recording sheet.

➢ Collect the 3-digit cards and repeat the steps to build another “greatest” sum.

➢ The winner of the game is the player with the most problems circled.
Learning Target: I will add 3-digit numbers

Independent Practice: Build the Greater Sum

Steps for Solving Word Problems

Q1. What is the problem about?

Q2. What do I need to find?

Q3. What do I know?

Q4. What can I try?

Q5. Does my answer make sense?
